I'm a Computer Science undergrad wielding a coder's arsenal: Python, Java, JavaScript, HTML, CSS, and Android development. My AI Grievance System and Personal Assistant projects spark innovation. As Campus Ambassador, I ignite career paths for peers. Fueled by AI and full-stack dreams, I'm primed to sculpt tomorrow's tech breakthroughs.

PROJECTS

AI Grievance Redressal System

AKTU & IBM HACKATHON

Revolutionizing complaint management in academia with a dual-platform (web & Android) solution. Users register, track, and get real-time updates on complaints. Powered by NLP for smart categorization, it's built with HTML, CSS, JS, React, MySQL (web) and Java (Android).

Personal AI Assistant (JARVIS-style)

PERSONAL PROJECT

Built a modular Python assistant using SpeechRecognition and pyttsx3 to execute system tasks via voice commands. Integrated OS control, web browsing, and Wikipedia API for information retrieval, enabling automation and natural language interaction.

MINI PROJECTS

PERSONAL PROJECTS

- Daily Task Reminder App | Python + GUI (Tkinter)
- Expense Tracker
- Library Management System | CRUD operation
- Virtual Coffee Machine (OOPs-based)
