

SUMMARY

AI Engineer and 4th-year Computer Science undergraduate specializing in Generative AI, Natural Language Processing (NLP), and scalable Machine Learning systems. Proven track record of designing backend architectures,optimizing Retrieval-Augmented Generation (RAG) data pipelines, and deploying secure AI integrations[cite: 1]. Driven by a performance-first philosophy, focusing strictly on architectural efficiency, clean API contracts, and building practical solutions for complex, real-world problems.

Education

- DR A.P.J ABDUL KALAM TECHNICAL UNIVERISTY

Bachelor of Technology in Computer Science & Engineering | 4th YEAR | CGPA: 8.2

GB NAGAR,UP

Aug.2023 – May.2027

Skills

- **Languages:** JAVA ,Python, SQL, HTML, CSS, JavaScript, MERN
- **AI/ML Frameworks:** LangChain, TensorFlow, PyTorch, Scikit-learn, Hugging Face, NLP, GANs
- **Competencies:** Generative AI, Machine Learning, Natural Language Processing (**NLP**), Computer Vision,Data Preprocessing, API Development, Full-Stack Development Fundamentals.
- **Tools & Technologies:** Git & GitHub, Hugging Face, Google Colab, REST APIs,**RAG** Pipelines, Blockchain.

EXPERIENCE

- Gen AI Intern | IIT Kanpur Prabandhan & EiSystems Technologies | June 2026 – July 2026

 - Engineered a real-time AI Interview System using the MERN stack and WebSockets for low-latency, seamless communication.
 - Integrated Google Gemini AI, leveraging LangChain and RAG (Retrieval-Augmented Generation) architectures to provide dynamic.
 - Implemented Redis caching to optimize application throughput and backend performance.
 - **Tech Stack:** Python, MERN Stack, Google Gemini, LangChain, RAG, Redis, WebSockets

Projects

- **Generative AI Image Colorization:** Built a GAN-based model to colorize black-and-white images
- **Real-time Object Detection System:**Developed a computer vision application using YOLO and OpenCV for real-time object detection in images and video streams.
- **NLP-based Resume Parser:** Created an NLP pipeline to extract and structure information from resumes using machine learning techniques.
- **AI Fact-Checking Browser Extension :** Built a browser extension that analyzes web content and verifies claims using NLP and RAG-based retrieval.
- **SAGE (AI CODE REVIEWER):** A Gemini-powered AI tool that analyzes code, detects bugs/vulnerabilities, and automates optimization. Ideal for developers and students building modern AI SaaS or portfolio projects.

Certifications and Achievements

- **Introduction to Generative AI :** Google Cloud, 2025

• **Bootcamp on Big Data & Data Science:** C-DAC Noida (FutureSkills Prime), Feb 2025

• **Advanced C++ Training (Score: 85%):** IIT Bombay – Spoken Tutorial Project, Jan 2025

• **Python Mega Course –** Learn Python in 60 Days, Build 10 Apps: Udemy, Feb 2024

• **Introduction to Large Language Models (LLMs):** Google Cloud, 2025

• **Introduction to Responsible AI:** Google Cloud, 2025

• **Data Analytics Job Simulation:** Deloitte (Forage), Feb 2026

• **Python & Django Framework for Beginners:**Udemy,Jan 2024

• **Google AI Essentials** Intro to Generative AI & Large Language Models (Google Cloud)
- Open Source Contributions
- **AI Grievance Redressal System** (Web & Android App):AI-based complaint registration and tracking system. (TypeScript, Android)

• **ATS-Checker:**Resume ATS score check

• **PyGitLoc:** A Python package to get lines of code from a GitHub repository.

• **Object Detection:** Image and Real-time video object detection.

• **Image Colorization:**Image restoration utility using Caffe DNN.

• Actively maintain version-controlled projects using Git and GitHub, following basic open-source workflows such as issue tracking and iterative improvements.
